

## NuFlex® 333 Silicone Sealant

**Product #** 943330011

### DESCRIPTION

**Ideal for aquariums up to 100 US gallons (400 liters)**

NuFlex 333 Aquarium Sealant is a one-part, moisture curing, 100% silicone sealant that has been specially formulated for aquarium construction. It will never shrink, dry out or crack; remains permanently flexible and is harmless to fish and plants. NuFlex 333 can be used to build aquariums that provide an unobstructed view of the fish, something not available in conventionally-framed aquariums. For instance, it can be used to build three, five, six-sided or other aquariums that can be subdivided into compartments, built-in to coffee tables or even attached to the wall. For aquariums less than 30 US gallons (120 liters), experts recommend the use of 6.4 mm (1/4") tempered glass because it provides for a better view into the aquarium.

### ADVANTAGES AND BENEFITS

- Permanently flexible - Resists humidity and vibration - Allows for the creation of unique aquariums

### TECHNICAL SPECIFICATIONS

<b>Product #</b>	943330011
<b>Brand</b>	Nuco
<b>Finish/Color</b>	Translucent
<b>Base</b>	100% RTV Silicone
<b>Optimal Adherence to</b>	Glass
<b>Features</b>	Waterproof, Non-Sag
<b>Tack-Free / Skin Over Time</b>	10 to 20 minutes
<b>Tooling Time</b>	5 minutes
<b>Packaging Specifications</b>	Plastic Cartridge
<b>VOC Concentration (EPA Method 24)</b>	32 grams per liter
<b>Recommended Use</b>	Shower Stall, Aquarium
<b>Volume</b>	300 ml
<b>Standards and Certifications</b>	ASTM B117 Test, ASTM C920, CAN/CGSB-19.13-M87

### APPLICATION

- Aquarium manufacture and repair - Aquariums up to 100 US gallons (400 liters) - Aquariums that are unique in shape for aquatic and non-aquatic animals NOTE: aquarium shape is limited only by the manufacturer's imagination

### IMPORTANT INFORMATION

- 100% Silicone - 100% RTV - Ideal for aquariums up to 400 liters (100 US gallons) - Excellent adhesion to glass - Create any imaginable aquarium shapes!
