

Solid Surface & Plastic Laminate 10"

Product # AT610721C

DESCRIPTION

- 0° hook
- ATP (FT) grind

Applications: For cutting double-sided plastic laminate, Plexiglas, and solid-surface materials such as Dupont, Corian, Wilsonart, Gibraltar & SSV, Fountainhead, etc. The 0° hook angle is suitable for table saws, radial arm, and similar machines.

ADVANTAGES AND BENEFITS

AT610721C: - Large european carbide micrograin carbides tips. - Carbide tips stay sharper longer resulting in extended blade life. - Maximum blade performance for perfect cut quality. - Unique technology to ensure perfect straightening, balancing and tension. - Micron-thin translucent non-stick blue-tinted coating. - Coating reduces heat build-up and resin accumulation. - Coating applied by using an electrostatic bonding process. - Environmentally friendly coating with easy clean up. - Subjected to extensive performance and quality tests. - Compatible with "SawStop" Safety System.

TECHNICAL SPECIFICATIONS

Product #	AT610721C
Blade Type	Circular Blade
Main Application	Acrylic, Plastic
Diameter	10 in
Teeth	72
Grind	MTC
Brand	Amana
Bore	5/8 in
Kerf (B)	0.126 in
Plate (C)	0.095 in
