

90° Corner Protector Molding

Product # HRU291290170

DESCRIPTION

This corner-shaped cover molding is used to complete 90° angles on glass balusters. Installed on top of the glass panel, this corner-shaped molding provides added stability while protecting handrail corners.

ADVANTAGES AND BENEFITS

Protects the top edge of the glass panel. Used to connect two glass panels in a 90° angle. Simply create the corner using the cover moldings for installation.

REQUIRED PRODUCTS

Requires the following products

Sales unit

Protector Molding Gasket
Product # HRUG29123090

Length of 3
linear meter

TECHNICAL SPECIFICATIONS

Product #	HRU291290170
Recommended Location Usage	Interior, Exterior
Finish	Stainless Steel
Material	Stainless Steel 316
Thickness	21.5 mm
Height	38.5 mm
Width	150 mm
