

Hot Melt Adhesive

Product # IGHM5130149D

DESCRIPTION

Odorless

The hot melt adhesives span a wide range of polymer technologies and are critical enablers to a broad range of manufacturing and end-use product applications. In packaging, converting, assembly, bookbinding, nonwovens, footwear, and many other markets, hot melt glues and adhesives offer a critical advantage: fast processing. Unlike water-based or solvent-based adhesives, hot melt adhesives do not require drying. Hot melts begin bonding almost immediately after application, as they cool down to their solidification point. This fast solidification is ideal for use on highly automated manufacturing lines that require rapid bond formation.

Window adhesives and sealants used for Mastic insulating glass sealant, intercept spacers, super spacers, flexible foam spacers, box spacers.
Sold in 55 gallon drums

ADVANTAGES AND BENEFITS

Value engineered Proven performance butyl sealant

TECHNICAL SPECIFICATIONS

Product #	IGHM5130149D
Finish	Black
Material	Butyl
Volume	55 gal.

IMPORTANT INFORMATION

- For industrial use only (building and construction) - Not a hazardous substance or mixture. Contact with molten products will cause thermal burns. Vapors/fumes may be irritating at application temperatures.
