IMPORTANT INFORMATION

PVC joints cannot be considered a total barrier against water damage and flooding. It is recommended to frequently inspect the product and pay particular attention to its use. It is recommended to replace the seals on a yearly basis.

DISCLAIMER

Note: Picture for visual reference only: actual product may vary from that shown in photo. Be sure to order hardware before beginning fabrication or installation work. Always use the instructions inside the packaging provided by the manufacturer, as the manufacturer reserves the right to make technical changes, or modify information without prior notice! All technical and drawings documents contain examples for the assembly of different supplier hardware. The customer cannot derive any claims from the use of these documents. No responsibility is assumed for design details relating to the construction or project. At any time the execution and installation must be done by qualified persons. Always make sure to fix properly the product using the right fixation for the proper material. Care: use a soft cloth and a mild soap without ammonia or abrasive. The use of harmful products can cause a premature degradation and cause breakage of the seal. Disclaimer: The above information and our technical advice on the implementation given in writing, verbally or in the form of tests are given knowingly but still not contractual. The advice does not relieve you of your responsibility to conduct yourself to verify the accuracy of data and products for their ability to process and particular purposes. The application, use and processing of our products and the realization of your projects under our technical recommendations are beyond our control and are therefore at your own risk. The sale of our products is subject to our terms of sale in force. Please note that if you refuse any return or claim for a non-packaged product.
