

Small Square Glass Clamp for Flat Surface Mounting

Finish

DESCRIPTION

45 mm high with safety pin

Clamp for mounting a glass panel on a flat surface or between two square posts. Glass drilling is required. Gaskets (sold separately) are required for installation. Choose gaskets based on thickness of glass for a perfect assembly.

ADVANTAGES AND BENEFITS

Stability and safety of the glass when the clamp is used with the safety pin.

Adjustment	Fixed Position
Category	Clamps
Baluster Post Type	Square Tube

APPLICATION

Ideal for glass railings and ramp guardrails.

INCLUDED PRODUCT(S)

Small square clamp Safety pin

DISCLAIMER

If a safety pin is not used during installation, there is a risk the glass will slip. If using a safety pin, the glass will need to be drilled. Ensure the use of proper gaskets, according to the thickness of the glass panel. Safety glass is always recommended. Product image is provided for reference only. The product may differ from the illustration. Order hardware before undertaking manufacturing or assembly work. Always follow instructions on product packaging as the manufacturer reserves the right to modify any product or product information without prior notice. All technical drawings and documents illustrate examples of mounting strategies. In no case may the client make a claim based on use of the technical documents. The manufacturer declines any responsibility regarding the structural details of any installation or project involving the hardware. Always ensure that installation is carried out by qualified professionals. Always ensure that the product is mounted onto an appropriate material.
